YOU DEMAND. WE DELIVER.

COURSE INFO:

This industry-leading training course provides a **comprehensive, hands-on experience** with the tablet manufacturing process. This is a unique training opportunity for product development professionals in the pharmaceutical industry.

TABLET COMPRESSION TOPICS

- Tablet Manufacturing Issues
- Troubleshooting tableting problems: (Formulation vs. Process solutions)
- International tooling standards
- Innovative tooling modifications for troubleshooting
- Tooling steels and coatings
- Multi-tip tooling technology
- Tablet design using TabletCAD software
- Engraving techniques

COURSE INSTRUCTOR:

PARTHIBAN, PH.D

Dr. Parthiban is the Pharmaceutical Manufacturing Consultant for Natoli Engineering Company for the Asia Pacific region. He graduated with a pharmacy degree from National University of Singapore and pursued a Ph.D. in pharmaceutical technology. Dr. Parthiban has authored several research articles in the field of solid dosage manufacturing in international journals. Areas of expertise include solids manufacturing systems, formulation development, and compression studies. His current responsibilities include tool design, solid dosage troubleshooting, and training professionals from the pharmaceutical industry and academia.
